

September 2023

CARE Team sees significant increase in care reports, offers advice to faculty and staff

During the month of September 2023, CARE Team saw a 73.43% increase in the number care reports submitted for students from September 2022, totaling 248 care cases worked. The top two concerns that were submitted for students included “direct statements indicating distress” and “needing support for their emotional wellbeing.”

managing social life and academics, and are unsure of the available supports here on campus. 55% of the students CARE Team worked with in September were freshmen who we were able to connect to resources on campus with Counseling and Psychological Services, Success Coaches and the Office of Student Accommodations and Testing being the CARE Team’s

such, the CARE Team encourages faculty and staff to [review the resources available on campus](#) to support the mental and emotional wellbeing of all Shockers.
